

Job description for Deputy Manager, Technology Role

About AL Circle

AL Circle is the world's first and fastest-growing virtual ecosystem for the global aluminium industry. With a mission to innovate, connect, and enable global trade, AL Circle empowers users to learn, promote, and conduct business seamlessly within the trillion-dollar aluminium economy. Anchored by a legacy of industry fostering collaboration, and inspiring industry-wide progress.

Addressing the entire ALuminium value chain from bauxite, alumina, and primary aluminium to end users and recycled metal, AL Circle is a one-stop solution for the global industry. ALuminium - the green metal, has a key role to play in the global efforts towards sustainability owing to its recyclability, lightweight, and numerous applications, and AL Circle's motto is to further the path to net-zero for our industry through digital tools, reliable connections, and efficient transactions. AL Circle's suite of offerings includes web platforms and mobile applications, the current focus of which are the news platform and the B2B marketplace, as listed below:

The Deputy Manager, Technology will work closely with the Senior Manager IT and Operations Director to work on a diverse array of technology applications. He/ she will also bring in the knowledge around best practices and new technologies to enrich the technical standards followed within AICircle. The candidate is also expected to play an active part in conceptualizing and delivering a number of technology initiatives.

The role will report to Senior Manager, Technology.

Roles and responsibilities

A. Develop, enhance and manage an array of technology applications

Such activities will encompass managing a number of in-house applications with the support of an internal technology team:

- Assisting in development and enhancement of the websites of AL Circle
- Responsible for testing and running an error free website
- Management and development of Mobile Apps
- Build campaign landing pages for the various digital marketing campaigns

- Periodic modification of each of the application for performance augmentation
- Build preparedness for future application tests (performance tests) and IT security audits
- Build necessary documentation standards and ensure that the team follows the same

B. Coordination with external technology partners

- AL Circle's Technology team works with multiple external technology partners. The Deputy manager will work closely with them and ensure that the timelines are met
- Periodic calls and action items will be driven by the role with the Tech partners

Desired skills & background

An ideal candidate will be expected to have knowledge in the following technologies:

- Languages: C#
- Web Application Development: HTML, JAVA Script, CSS, .Net Core & Angular.
- DBMS Packages: SQL Server 2000
- Operating System: Microsoft Windows(Windows 10, Windows 8, Windows 7)
- Understanding of SDLC will be key for this role
- Knowledge of Agile methods will be important for this role
- Exposure of working in start-ups will be an advantage

Experience and qualification:

- Should have BTech/ BE/ BCA/ MCA or BSc/MSc IT background
- 2+ years of experience
- Should be dynamic, willing to learn new technologies

Place of Posting: Kolkata
